

Cloud Management **Made Simple** with the Power of VAST View™

The Challenge

Managing cloud infrastructures can be substantially more complex than traditional data infrastructures; however, cloud infrastructures have the potential to become highly optimized, intelligent systems that improve enterprises.

With the opportunity to automate tasks and processes combined with the expertise of a managed service provider, the relationship between scale and complexity is rapidly diminished. VAST View™ is a policy-driven solution that provides full visibility across cloud infrastructures, allowing the ability to identify optimization opportunities for cost, usage, performance and security, and then automations to simplify.

What is VAST View™?

VAST View™, powered by CloudHealth, is the leading Cloud Service Management platform, providing a centralized console to simplify management and streamline billing to deliver value added services. VAST View™ integrates with public cloud service providers like Amazon Web Services, Google Compute Platform, Microsoft Azure, and resources in the data center. The platform provides a centralized hub with consolidated data, robust analytics, integrated reporting, optimization recommendations, and governance.

Benefits of VAST View™

CUT COSTS

- Save 10-20% on cloud expenses starting day one
- Keep cloud resources optimized

GO FASTER

- VAST View™ helps reclaim hundreds of hours per year
- Manage and understand cloud performance

REDUCE RISK

- Governance simplified – create rules to manage infrastructure
- Stay ahead of vulnerabilities before they cause problems

SIMPLIFY MANAGEMENT

- Rightsize millions of instances with one click
- Tame shadow IT with visibility across all users

POWERED BY **CloudHealth**

Cloud Management Services

- Customer billing and burndown tracking
- Create dynamic business groupings, called Perspectives
- Cost, usage and performance management reporting
- Customer Health Checks
- Cost optimization and recommendations
- Rightsizing analysis and recommendations
- Centralized governance and policy management
- Cloud migration assessments to AWS or Azure

Extended Service Profile

- Reporting, monitoring, management, and remediation on behalf of clients
- Monitoring, reporting, and assessments with recommendations for overall cloud management and optimization opportunities
- Assessment services which highlight opportunities and recommendations for optimization of cost, performance, cloud governance, and security

VAST View™ Offerings

Managed Service levels aligned with business objectives

- Cloud Essentials
- Optimization and Management
- Governance, Policy and Security
- Orchestration and Automation
