

# Manage Your Cloud Not the Other Way Around

## VAST View™ Makes Cloud Management Simple.

**Managing cloud infrastructures can be substantially more complex than traditional data infrastructures; however, cloud infrastructures have the potential to become highly optimized, intelligent systems that improve enterprises.**

With the opportunity to automate tasks and processes, the relationship between scale and complexity is rapidly diminished. **VAST View™** is a cloud management platform and a policy-driven solution. You get full visibility into your entire cloud infrastructure, allowing you to identify opportunities for cost, usage, performance, security, and availability optimizations and then automations to simplify. In other words, you manage your cloud to manage itself.

## IT without Limits.

On-premise, hybrid cloud, multi-cloud. Every IT infrastructure is different. There is no end to the complexities and demands of varying applications and assets, but complexity can be simplified. **VAST View™** monitors your accounts, applications, assets, and services and calls your attention to opportunities for automation.

## Visibility

In large cloud environments, even in the best case scenario, it's common for the right hand to lose track of what the left hand is doing. **VAST View™** brings global consolidated visibility and on-demand reporting across your entire cloud environment so you can identify and manage issues before they become problems.

## Optimization

Many organizations turn to cloud-based infrastructure to achieve efficiency and cost savings. But you won't accomplish these goals without cloud optimization—constant tuning, managing and automation of your assets. With **VAST View™**, driving efficiency no longer requires labor intensive manual alterations—Instead, you can automate workflows, programmatically tune your infrastructure and see your entire environment in one pane of glass. The result is a cost and performance optimized architecture that scales without added complexity.

## Governance

You can't control billions of data points — but **VAST View™** can. With multiple users across many departments deploying new services, applications, and assets, the rate of change is beyond the scale of human management. This makes manual evaluation, analysis, optimization, and reporting difficult, if not impossible. **VAST View™** automates and controls assets based on enforcing business policies and governance definitions set by you.

POWERED BY **CloudHealth**

## What Can VAST View™ Do For You?

### CUT COSTS

- Save 10-20% on cloud expenses starting day one
- Keep your cloud continuously optimized

### GO FASTER

- Reclaim hundreds of management hours per year
- Manage and understand cloud performance

### REDUCE RISK

- Governance simplified – create rules to manage infrastructure
- Stay ahead of vulnerabilities before they cause problems

### MANAGE COMPLEXITY

- Rightsize millions of instances with one click
- Tame shadow IT with visibility across all users

## Ready For A VAST View™ Health Check?

On-premise, hybrid or multi-cloud: VAST View™ delivers visibility, insight and oversight, with policy-driven optimization that maximizes performance and minimizes cost. Policy-driven optimization is unquestionably the fastest way to maximize usage, costs and performance.

If you'd like to learn more about **VAST View™** and how we can work for you, all it takes is 20 minutes. Let us walk you through our solution rich platform and show you how we can help you scale your cloud without scaling your IT workforce.

or call **800.432.VAST** to schedule your demo.

AS YOUR ENVIRONMENT GROWS,  
SIMPLIFY IT.

1

### CONSOLIDATE

Consolidate cloud infrastructure & data

2

### EVALUATE

Create dynamic business perspectives

3

### ANALYZE

Analyze usage, cost & performance by business perspectives

4

### OPTIMIZE

Recommend & execute for optimization

5

### AUTOMATE

Automate & define business policies
