

# Managed Veeam Backup for Microsoft Office 365

Using Office 365 for email means you don't have responsibility for the infrastructure that runs your email software. You still have responsibility for the email itself, however.

That means you can't rely on Microsoft's backups and support for meeting your compliance and e-discovery obligations. You need to make sure you have backups that Microsoft doesn't control and that you have immediate access to.

Veeam Backup for Microsoft Office 365 gives you control over your email backups, making sure you have the mail files you need available to satisfy your legal obligations.

## Veeam Backup for Microsoft Office 365

Using Veeam Backup for Microsoft Office 365 ensures that your backup strategy meets your responsibilities.

### With Veeam Backup, you gain these backup benefits:

- full control over retention policies
- reduce the costs of maintaining backups in the cloud
- use the same tools to backup Office 365 in the cloud and on-premises
- backups stored in a different location than original data

### Veeam's Backups also give you these recovery benefits:

- recover specific mailbox items (email, contacts, calendars) to Office 365 or on-premises mailboxes or as files
- easily apply e-discovery to Office 365 mail
- achieve more rapid recovery objectives
- use the same tools to recover email no matter where the original data resides
- migrate mailbox data between cloud and on-premises Office 365

## Managed Veeam Backup for Microsoft Office 365

The criticality of email to business combined with increased regulatory and compliance requirements means having secure, accessible backups is fundamental to reduce the business risks associated with email.

Managed Veeam Backup for Microsoft Office 365 from VAST ensures that your Office 365 backups are configured properly, executed properly, and stored securely. Expert monitoring ensures that any problems are addressed immediately to ensure the reliability of this vital business process. 24x7 support guarantees the backups are available when you need them.

Let VAST's Veeam expertise give you peace of mind that you are protecting critical business data with our Managed Veeam Backup for Microsoft Office 365.
