

# 10 Things You Must Have in a Managed EDR Solution

Choosing the right Endpoint Detection and Response (EDR) service can be a critical decision for your business. The right solution can be difficult to choose. This checklist will help you compare and identify the key features that align with your business needs.

## 24/7 SOC Monitoring

Round-the-clock monitoring by a dedicated security operations (SOC) team.

## Rapid Incident Response

Quick threat analysis and containment to minimize downtime and prevent further damage.

## False Positive Reduction

Look for accurate alerts and low false positives, to help your team focus on real issues.

## Easy Deployment and Integration

Easy deployment and integrates well with existing security tools without disrupting your operations.

## Excellent Visibility

Near real-time visibility into endpoint activity, to quickly detect and deal with the potential threats.

## Clear, Actionable Alerts

Straightforward alerts and actionable recommendations, so your team knows what steps to take.

## Tailored Protection

Adapts to your environment to provide alerts and protection based on your specific needs.

## Expert Guidance

Guidance from cybersecurity experts who can help your team understand and resolve threats.

## Scalability

Easily scale to protect your network, regardless of your business's current or future size.

## Predictable Costs

Transparent pricing and no hidden fees to maintain cost-effective security for your business.
